**FORTBRAND SERVICES AND AL-JON MANUFACTURING ANNOUNCE
CONVERSION TO A WAFER BROOM OF TWO (2) VAMMAS PSB5500 MULTI-
FUNCTION VEHICLES FOR THE MASSACHUSETTS PORT AUTHORITY AT
LOGAN INTERNATIONAL AIRPORT (BOS)**

Plainview, New York, June 15, 2016

Fortbrand Services, Inc., the exclusive worldwide distributor of the Vammas snow removal product line, and Al-jon Manufacturing LLC, North American manufacturer of the Vammas snow removal product line, announced the conversion of two (2) Vammas PSB5500 vehicles to 46" wafer brooms from the 36" cassette brooms originally provided with the vehicles.

The latest 46" wafer broom technology provides the best and cleanest snow sweeping result available. The broom has an independent suspension from the chassis, eliminating bouncing, resulting in improved sweeping.

Vammas PSB vehicles have revolutionized the method by which snow removal is accomplished on runways and taxiways at major North American airports. The reliability of Vammas PSB vehicles in clearing runways within predictable minimal time frames has resulted in aircraft arrival rate increases and substantial savings in delay costs to the airlines, as well as a reduction in operating, maintenance and human resource costs for airport operators.

Fortbrand Services is a niche business specializing in the sale, lease and rental of aircraft ground support equipment throughout the aviation industry. The Company also acts as a distributor of unique aviation and airfield maintenance equipment, including high-speed Vammas snow removal vehicles, the Hagie GST 20 multi-season airport vehicle, the Beam multi-task airport service vehicle and glycol recovery vehicle, the Bergkamp FP5 flameless pothole patcher and the Prinoth SW4S all season snow removal and summer maintenance vehicle.
