**FORTBRAND SERVICES AND AL-JON MANUFACTURING ANNOUNCE
CONVERSION TO A WAFER BROOM OF SIX (6) VAMMAS PSB5500 MULTI-
FUNCTION PLOW, SWEEPER, BLOWERS FOR THE CALGARY AIRPORT
AUTHORITY (YYC)**

Plainview, New York, November 15, 2013

Fortbrand Services, Inc., the exclusive worldwide distributor of the Vammas snow removal product line, and Al-jon Manufacturing LLC, North American manufacturer of the Vammas snow removal product line, announced the conversion of six (6) Vammas PSB5500 vehicles to 46" wafer brooms from the 36" cassette brooms originally provided with the vehicles.

The latest 46" wafer broom technology provides the best and cleanest snow sweeping result available. The broom has an independent suspension from the chassis, eliminating bouncing for improved sweeping. The Calgary Airport Authority had previously outfitted its fleet of Vammas PSB5500 vehicles with the advanced technology Vammas P8400 flexible polyethylene moldboard plow.

Vammas PSB vehicles have revolutionized the method by which snow removal is accomplished on runways and taxiways at major North American airports. The reliability of Vammas PSB vehicles in clearing runways within predictable minimal time frames has resulted in aircraft arrival rate increases and substantial savings in delay costs to the airlines, as well as a reduction in operating, maintenance and human resource costs for airport operators.

Fortbrand Services is a niche business specializing in the sale, lease and rental of aircraft ground support equipment throughout the aviation industry. The Company also is a distributor for unique airfield maintenance equipment, including high-speed Vammas snow removal vehicles, the multi-function Hagie GST 20 Sprayer, the Beam A8000 Multi-Task Airport Service Vehicle and the Bergkamp FP5 Flameless Pothole Patcher.
