### **FORTBRAND SERVICES ANNOUNCES THE SALE OF ONE VAMMAS PS3500 EDGE LIGHT PLOW TO ST. JOHN'S INTERNATIONAL AIRPORT (YYT)**

Plainview, New York, April 1, 2017

Fortbrand Services, Inc., exclusive worldwide distributor of the Vammas snow removal product line, today announced the sale and delivery of one (1) Vammas PS3500 edge light plow to the St. John's International Airport Authority for use at St. John's International Airport (YYT).

The Vammas PS edge light plow, with sweepers, is designed to be an efficient, heavy duty V-plow, which can be mounted to a wheel loader, a tractor or a high clearance farming tractor, with a quick attachment. The only connections needed are one set of hydraulic ports and electric voltage from the base vehicle. During the cleaning, the operator opens the front cone of the plow in front of the edge light, and the sweeping brushes start to rotate. Edge lights can be cleaned immediately after the snow event, with minimal human resources – sending out a team of electricians to shovel around the edge lights is no longer necessary. The Vammas PS edge light plow comes in two models – the 3500, for shorter edge lights, and the 4200, for taller edge lights and airfield signage.

*Fortbrand Services is a niche business specializing in the sale, lease and rental of aircraft ground support equipment throughout the aviation industry. The Company also acts as a distributor of unique aviation and airfield maintenance equipment, including high-speed Vammas snow removal vehicles, the Beam multi-task airport service vehicle and glycol recovery vehicle, the Bergkamp FP5 flameless pothole patcher and the Prinoth SW4S all season snow removal and summer maintenance vehicle.*
