

10,000/18,000 Gallon Portable Tanker

The 10K and 18k Portable Tankers serve both Ground Support and Airport Maintenance teams, making it the most versatile piece of equipment in your fleet.

Whether you need to pump de-icing fluid onto an aircraft or store glycol for environmental compliance, this tanker has you covered.

Applications

- Pumps de-icing fluid directly into aircraft for GSE
- Safely stores glycol during AME tasks to meet environmental standards
- Mobile and easy to integrate into any operation
- One piece of equipment, endless possibilities.

Versatile, Mobile, Easily Integrated.

Features

Tool Balancer

Lessens the load of a hose full of chemicals. It is adjustable and carries a portion of the weight of the hose to help the operator move and hook up hoses.

Ball Valve

A shut off valve. A one piece valve with pipe threads on each end.

Valve Handle Orientation

If the handle is inline with the piping it is "ON", if the handle is crossways to the piping it is "OFF".

Camlock Fitting

A quick disconnect fitting, with two cam over levers that tighten the 2 halves together for a leak free connection.

Manway Covers

Both outer manway covers and inner tank manway covers.

Sight Gauges

Two kinds of sight gauge: an inner tank that shows volume on the inside tank., and an interstitial on that will show if there is fluid in the space between the two tanks.
