

THE BIRTH OF A NEW REVOLUTION

About us

Fortbrand Services is dedicated to doing its part in providing electric GSE solutions for our business partners electrification initiatives.

We are ready to serve you with your eGSE needs. Whether it's new, refurbished, upgraded, or converted, Fortbrand is an eGSE solution.

”

**We didn't say,
'Sorry, we can't help
you until you work
with the airport and
upgrade your
infrastructure.' We
provided alternative
technology.**

*SENIOR VP GSE,
MIKE TROCHALAKIS*

Scenarios where our sales expert, Nicole Romeo, and the technical team led by our maintenance director, Shawn Love, shine!

Our partner requested numerous bag tractors for their operation. Fortbrand worked hand-in-hand with them to understand the current environmental conditions, charging infrastructure, and airport requirements.

Working with our other business partner, we installed Averest-Flux Power 80V Lithium-Ion dual pack battery, providing 420AH with a new 6.6kW onboard charger. Along with modifying the tractors' charge port to not only accept the standard smart charging device but now the tractor can be charged with a power supply utilizing the standard J1772 charge port, modifying the first of its kind within this specific application

WATCHING THE MAGIC UNFOLD

The Jet-16 arrival

Rows of Innovation

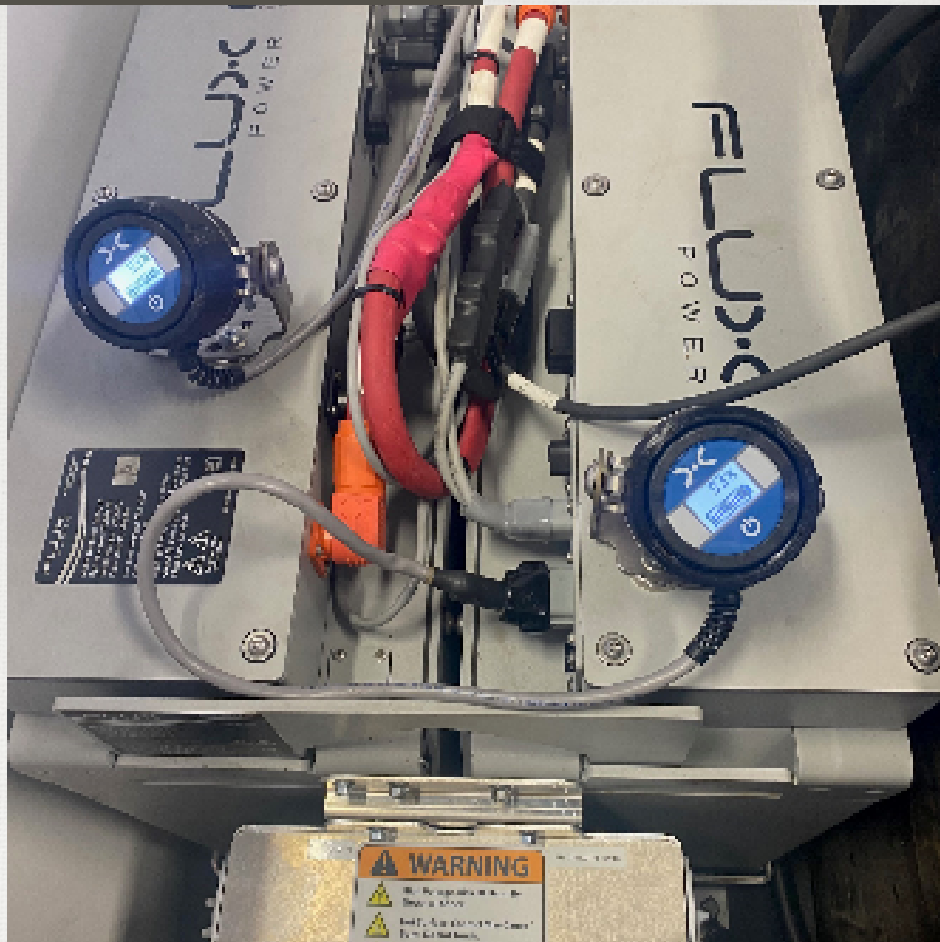

Jet-16s offloaded

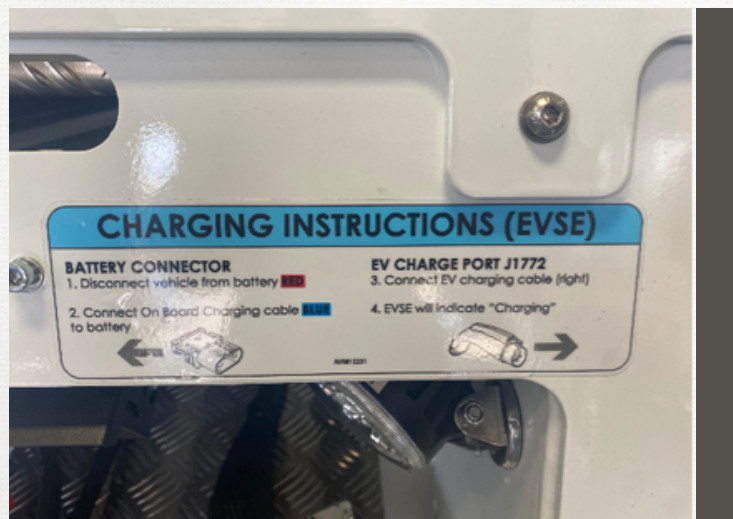

Lithium battery installation

Addition of onboard charger and BMs

Installation of Advvez Telemetry

10 Jet-16s loaded and shipped to our customer in YYC

Are you looking to discuss
eGSE at your location?
